

## Session 2:

- **Action item:** Complete first 5 Preparation steps in [eCQM Implementation Checklist | eCQI Resource Center](#)
- **Action item:** Access measure specifications
  - [Colorectal Cancer Screening | eCQI Resource Center](#)
  - [eCQM Flow: Colorectal Cancer Screening CMS130v10](#)
  - Remember, [this video](#) gives you an overview of how to access and what you'll find there.
- **Action Item:** Study your current process, keeping in mind the problem statement crafted in Session 1 and the specifications reviewed here in Session 2.
  - If you are looking for a tool for studying your current processes, the following may be helpful:
    - [Guide to Improving Care Processes and Outcomes in Health Centers](#) - HITEQ
    - [Swim Lane Map](#) - Minnesota Dept. of Health
    - [Map Your Workflows to Improve Care](#) - Center for Care Innovation
    - [Guide to Process Mapping: Definition, How-to, and Tips - Asana](#)
    - [Swimlanes Diagram Template - Miro](#)
    - Or, you might use the eCQM flow and make notes as to how each portion happens in their clinic.
- **Action Item:**
  - Thorough reviewing the specifications and studying your current processes
    - Identify one specific area where patient records ARE meeting the measure (where you can say, this is definitely not a problem that is impacting performance on the measure).
    - Identify one specific area where the patient records are NOT meeting the measure (where you can say, this probably IS a problem that is impacting performance on the measure)
  - **Complete your Action Work: Share what you found while completing the steps above through [this google form](#).**
