

## Session 2 Cervical Cancer Screening

- **Action item:** Complete first 6 Preparation steps in [eCQM Implementation Checklist | eCQI Resource Center](#)
- **Action item:** Access measure specifications
  - [Cervical Cancer Screening | eCQI Resource Center](#)
    - Click on the *Specifications and Data Elements* tab for more, and under the *Attachment* header toward the top, you will find more helpful links, including a PDF of the eCQM Flow for this measure.
  - Remember, [this video](#) gives you an overview of how to access and what you'll find there, and [this video](#) shows how to access all of the codes for valuesets.
    - Note that these videos are a few years old at this point, so there have been a few changes to where certain resources are, but the videos are still helpful for understanding how to navigate.
- **Action Item:** Study your current process, keeping in mind the problem statement crafted in Session 1 and the specifications reviewed here in Session 2.
  - Or, you might use the eCQM flow and make notes as to how each portion happens in your clinic.
- **Action Item:** Through reviewing the specifications and studying your current processes, do the following:
  - Identify one specific component where patient records ARE meeting the measure specifications (where you can say, this is definitely not a problem that is impacting performance on the measure).
  - Identify one specific component where the patient records are NOT meeting the measure specifications (where you can say, this probably IS a problem that is impacting performance on the measure)
- **Complete your Action Work:** Share your finding from completing the steps above through [this google form](#) by **August 5, 2024.**
